

i subscribe to xm radio because it offers a better choice of programing than any of my local stations. the NAB and their lobbyists should look for ways to improve their broadcasting rather than try to stop a service that i pay for. the reason i subscribe is so i can listen to music that none of my local stations provide and i don't have to listen to some stupid disk jockey ramble on about nothing and selecting what i have to listen to.
p;ease ignore the NAB's petition 04-160
